

# Happy New Year 2022

I wish you to dream in 2022, to dream for you, for your family and put all your energy into making those dreams come true.

**This is the only reasonable resolution we can take.**

For the global economy, the path that will be followed in 2022 may look very different depending on the dominant elements.

Will it be inflation, international tensions, the metaverse, the renewal of the health crisis, the elections in France and the US, many other factors or a combination of all?

***The only certainty*** for the years to come is the necessary energy transition. We must reduce the consumption of fossil fuels to make the lives of our children and grandchildren viable. It is both a collective and an individual challenge. We have to face it without delay.
